

Martin Janevski

martin.janevski.dev@gmail.com | linkedin.com/in/martinjanevski1994 | remotedevoffice.com | Skopje, North Macedonia (Remote, CET)

Professional Summary

Senior software engineer and frontend specialist with proven expertise in **Angular (v12-v22)**, **React**, **TypeScript** and RxJS, plus Vue.js and **.NET** for full-stack support. Builds scalable component architectures, state management (NgRx Store and Signal Store), Nx monorepos and Module Federation micro-frontends. Built frontends for real-time financial data and trading transactions (Freight Investor Services) and owned core products end to end (Kody CRM). Works remotely from Skopje (CET) with teams across Europe.

Core Competencies

Angular (v12-v22) & TypeScript

RxJS & NgRx

React, Vue.js & Ionic

Nx Monorepos & Micro-frontends

Frontend Architecture

Fintech & Data-heavy UIs

.NET & RESTful APIs

AI-Assisted Development

Work Experience

Remote Sourcing GmbH

Apr 2023 - Present

Freelance Software Engineer

Europe (Remote)

- Deliver client-tailored web engineering and full-stack software solutions for European enterprise accounts.

Kody

Jan 2025 - Jul 2025

Software Engineer (Part-time)

London Area, UK (Remote)

- Engineered performant web and hybrid mobile apps using smart/dumb component architecture to ensure scalable codebases and optimized bundle sizes.
- Consolidated multiple Angular and Ionic applications into a single Nx workspace, standardizing development workflows and cross-project code sharing.
- Implemented NgRx Store for complex enterprise applications and NgRx Signal Store for streamlined state management in lighter services.
- Architected Nx-based micro-frontends using Module Federation with dynamic host/remote setups for independent deployments and isolated development.
- Took full ownership of the core Kody CRM application, drove key platform initiatives, and built the Kody Order Progressive Web App (PWA).

Polar Cape

Sep 2021 - Jan 2025

Software Engineer

Skopje, North Macedonia

- Freight Investor Services (FIS): Built robust frontend architectures handling **real-time financial data and complex trading transactions** with high reliability for global trading operations.
- Delivered high-performance digital applications for global leaders in finance and enterprise innovation (Angular, TypeScript, .NET, RESTful APIs, Angular Material).
- Bizlab: Partnered with the Stockholm-based innovation studio to engineer clean, maintainable frontend applications supporting rapid prototyping and enterprise-grade product launches.

Bransys

Aug 2019 - Sep 2021

Software Engineer

Chicago, IL / Skopje

- Built and maintained Vue.js single-page applications leveraging Vuex state management.
- Engineered custom software solutions across transportation, construction, and waste management industries for 500+ global clients (Vue.js, TypeScript, .NET, SQL).
- Designed vehicle tracking interfaces integrating Google Maps and Leaflet.js (OSM), and built interactive fleet analytics dashboards using Highcharts JS.
- Maintained core fleet management software across jQuery, RazorPages, and Vue.js, implementing Kendo UI for high-performance data grids.

Neocom AD Skopje

May 2019 - Aug 2019

Software Engineer Intern

- Developed web application components using Angular, .NET Framework and REST APIs.

ExpertsQA

Jun 2018 - Sep 2018

Quality Assurance Intern

- Executed software testing protocols, agile workflows and responsive UI validations.

Skills

Frontend: Angular (v12-v22), TypeScript, JavaScript (ES6+), RxJS, NgRx Store & Signal Store, HTML5/CSS3, Angular Material, Vue.js, Vuex, React, Redux

Architecture: Component-Based (Smart/Dumb) Architecture, State Management, Nx Monorepos, Micro-frontends (Module Federation), Progressive Web Apps (PWA)

APIs & Backend: RESTful APIs, .NET Framework / C#, SQL

Methods & Tools: Agile/Scrum, Git, CI/CD, Development Automation (Husky, ESLint, Prettier), AI-Assisted Development (Cursor, Claude)

Libraries & Visualization: Highcharts JS, Google Maps API, Leaflet.js, Kendo UI, Angular Material, Bootstrap
